Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The study of combination nutrient management for sustainable and economically viable onion seed production at Maitsebri, Northern Ethiopia, holds significant importance for the scientific community. Onion seed production is a critical component of agricultural systems and optimizing nutrient inputs can enhance yield, seed quality and cost-effectiveness, thereby benefiting smallholder farmers. Sustainable practices that integrate nutrient management also contribute to soil health and long-term agricultural productivity in regions with resource constraints. Furthermore, findings from such research can provide valuable insights into addressing global challenges of food security and climate resilience in similar agroecological zones.
