

Review Form 3

Journal Name:	Asian Soil Research Journal
Manuscript Number:	Ms_ASRJ_130427
Title of the Manuscript:	Characterization of different soil types under cocoa, cashew and rubber fields in Center-West Region of Côte d'Ivoire
Type of the Article	research article

General guidelines for the Peer Review process:

This journal’s peer review policy states that **NO** manuscript should be rejected only on the basis of ‘**lack of Novelty**’, provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript addresses a critical and timely subject regarding the potential of Indian grasses for sustainability in the textile industry. The exploration of grass fibers as sustainable materials can significantly contribute to reducing environmental impacts associated with traditional textile production. Moreover, the study highlights a promising pathway for integrating natural resources into industrial applications, advancing both ecological and economic sustainability.	
Is the title of the article suitable? (If not please suggest an alternative title)	The current title, "Indian Grasses and their Potential for Sustainability," is suitable as it accurately reflects the manuscript's content. However, a slightly refined title like "Indian Grasses: Unlocking Their Potential for Sustainable Textile Applications" could add more specificity and appeal.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive but could benefit from a clearer emphasis on the practical applications of the research findings. I recommend adding a sentence summarizing how the use of Indian grasses in textiles could address key sustainability challenges in the industry.	
Is the manuscript scientifically, correct? Please write here.	Yes, the manuscript is scientifically robust and technically sound. The methodology is clearly outlined, and the results are well-supported by experimental data.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are adequate and relevant to the study's scope. However, the manuscript could include some more recent references from 2022–2024 that discuss advancements in sustainable textiles or similar natural fibers.	
Is the language/English quality of the article suitable for scholarly communications?	The language is clear and appropriate for scholarly communication. Minor edits for grammar and readability would further enhance the manuscript.	
Optional/General comments	The manuscript could further discuss the scalability of using grass fibers in textile applications. Addressing challenges in large-scale production, such as processing costs and consumer acceptance, would strengthen the practical implications of the study.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
