

Review Form 3

Journal Name:	Biotechnology Journal International
Manuscript Number:	Ms_BJI_130998
Title of the Manuscript:	Morpho-Physiological Adaptations of Sorghum to Drought: Implications for Biomass Production and Grain Yield
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript is crucial for the scientific community as it highlights key traits like stay-green, green leaf area, and relative water content that contribute to sorghum's drought resilience. The findings provide valuable guidance for breeding programs aimed at developing climate-resilient sorghum cultivars, enhancing food security in arid and semi-arid regions. This research deepens our understanding of plant responses to environmental stressors, making it a valuable addition to agronomy and plant breeding.
