

Review Form 3

Journal Name:	Current Journal of Applied Science and Technology
Manuscript Number:	Ms_CJAST_129849
Title of the Manuscript:	Geographic Distribution and Seasonality Patterns of COVID-19 Cases in Primary Care Units: A Descriptive Study.
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable insights into the geographic and seasonal trends of COVID-19 cases, offering critical data for public health planning and resource allocation. It highlights the interplay between environmental, social, and demographic factors in disease distribution, which is particularly important for optimizing healthcare interventions. The focus on primary care units emphasizes their role in disease management at the community level, providing actionable recommendations for healthcare policymakers.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is suitable as it accurately reflects the study's scope and findings. However, for added clarity, consider specifying the region in the title, such as: <i>"Geographic Distribution and Seasonal Patterns of COVID-19 Cases in Primary Care Units in Puebla, Mexico: A Descriptive Study."</i>	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive and provides a clear summary of the study's aims, methodology, results, and conclusions. It effectively highlights the significance of geographic and seasonal trends. No significant additions or deletions are required. However, you may simplify some technical terms for broader accessibility.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically robust and methodologically sound. The study design, data collection, and statistical analysis are appropriate for achieving the stated objectives. The discussion integrates findings with existing literature effectively.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient and recent, covering relevant studies from 2019–2024. However, additional references comparing findings from other regions or countries with similar socio-economic or climatic conditions could further enrich the discussion.	
Is the language/English quality of the article suitable for scholarly communications?	The language is suitable for scholarly communication. Some minor grammatical and stylistic improvements could enhance readability. For instance, ensure consistency in verb tenses and refine lengthy sentences for clarity.	
Optional/General comments	The manuscript could benefit from a stronger emphasis on how its findings contribute to global COVID-19 management strategies. Highlighting practical applications for primary care units beyond the study region could increase its impact.
