

Review Form 3

Journal Name:	European Journal of Nutrition & Food Safety
Manuscript Number:	Ms_EJNFS_130553
Title of the Manuscript:	Assessment of Food Safety Practices, Associated Factors and Microbial Contamination of Fried Nile Perch in Mwanza City Markets: A Cross-Sectional Study
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Urban markets are critical points where food products reach consumers directly and are of critical importance in terms of public health, economic sustainability and their role in the food supply chain. Lack of food safety practices in these markets can pose serious risks to public health. They are foods that are consumed quickly, such as fried fish, and can create a suitable environment for microorganisms when hygiene is not taken into account. Food safety standards applied in urban markets are a reflection of the general food supply chain. Determining microbial contamination levels and determining the factors affecting this can contribute to the development of more effective food safety policies. Such studies provide basic data for stricter regulations and development of educational programs in urban markets. These scientific evaluations can inform consumers about making safer food choices.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title of the article is appropriate	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The summary of the article is comprehensive.	
Is the manuscript scientifically, correct? Please write here.	Article data were evaluated statistically. There is sufficient literature to provide general information on hygiene. However, when interpreting the data obtained, more citations from previous similar studies are required. It may be more understandable if the numerical values of the studies cited in the discussion section are stated in the text.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The literature included in the study is stated in the references section. [40] is cited from the literature on page 16, but its number is not given in the text. [18]. The literature is on page 11 in the text and should be placed higher. The study used up-to-date references to provide general information. However, the following studies should also be reviewed: Ahmad, B. L., Hassan, M., & Ibrahim, I. S. (2024). Quality evaluation of fried fish sold in Katsina metropolis. Geraldo, V., Ampofo-Asiama, J., Adinortey, C. A., Okyere, I., Tulashie, S. K., Nuer, A. T. K., ... & Kizzie-Hayford, N. (2024). Implementation of good manufacturing practices (GMP) to improve the quality of smoked fish (<i>Scomber colias</i>). <i>Heliyon</i> , 10(5).
