

### Review Form 3

Journal Name:	<a href="#">International Journal of Biochemistry Research &amp; Review</a>
Manuscript Number:	Ms_IJBCRR_130416
Title of the Manuscript:	Computer-aided drug design of small-molecule compounds targeting TIM-3 for cancer immunotherapy
Type of the Article	Original Research Article

#### **PART 1:** Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The expensive, tedious, and laborious pursuit of drugs for a particular disease is greatly addressed by using CADD methods. The surveillance of potential drug candidates can be done without the hassle of wet laboratory experiments. Investigation of compounds and interaction with the target molecule can be extensively explored with these kinds of studies.	
Is the title of the article suitable? (If not please suggest an alternative title)	YQG-like compounds can be used instead of "small-molecule compounds" on the title or a different wording that can indicate the limitation of surveying compounds similar to TIM-3 inhibitor.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Place and duration of the study can be mentioned under the Methods. TIM-3 can be defined in the Abstract part.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically sound.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The author can cite/mention the programs or applications used where the images are generated in Figure titles.	
Is the language/English quality of the article suitable for scholarly communications?	The language quality is fine, however, please ensure that the manuscript is free of any grammatical and spelling errors. It is also suggested to remove the use of word "renowned" in Methodology part that described the programs/applications used.	
<u>Optional/General</u> comments	<b>In the Introduction, it was mentioned that the study aimed to investigate the therapeutic potential of targeting TIM-3. However, there was no method used to answer this objective.</b>  <b>Druglikeness can also be included in the study.</b>	

**Review Form 3**

**PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

**Reviewer Details:**

Name:	<b>Joy Elaine K. Diacos</b>
