

Review Form 3

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_130825
Title of the Manuscript:	Effects on Birds in Natural and Man-made Climate change scenario
Type of the Article	Review Article

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This is a mini-review on the effects of climate change on birds. Firstly, I note that this review has a broad geographic scope but with a focus on new world birds. on new world birds, therefore, in itself, deals with very broad issues	
Is the title of the article suitable? (If not please suggest an alternative title)	Effects on Birds in Natural and Man-made Climate change scenario: a Neotropical perspective.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract should focus on summarising the introduction, material and methods, results, discussion and conclusions, discussion and conclusions.	
Is the manuscript scientifically, correct? Please write here.	It needs more references and set up the main objectives.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	NO	
Is the language/English quality of the article suitable for scholarly communications?	YES	
Optional/General comments	<p>In my opinion, in the field of climate change, there is less literature on birds in the Nearctic than in the literature on birds in the Palearctic and for this reason the authors should take advantage of this gap. authors should take advantage of this gap by looking for a specific topic to expand on. In general terms, this article is in line with the general lines of this journal and for this reason it should be accepted.</p> <p>The author(s) should select a biological set and expand on it as much as possible and not deal with such general topics as reproduction, etc. This would increase the scientific interest of the article.</p>
