Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Post-Dural Puncture Headache (PDPH) is a significant complication that can occur after procedures involving dural puncture, such as spinal anesthesia, lumbar puncture, or myelography. The importance of PDPH lies in its potential to cause significant discomfort, morbidity, and even long-term consequences	
Is the title of the article suitable? (If not please suggest an alternative title)	YES	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	YES	
Is the manuscript scientifically, correct? Please write here.	YES	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	YES	
Is the language/English quality of the article suitable for scholarly communications?	YES	
Optional/General comments	PDPH is a common complication: PDPH occurs in up to 30% of patients after dural puncture, making it a significant concern for healthcare providers Need for further research: Despite its frequency and impact, PDPH remains poorly understood, and further research is needed to elucidate its pathophysiology and optimal management.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
