PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The study concept depicts an important manuscript but methodology leaves more to be desired	
Is the title of the article suitable? (If not please suggest an alternative title)	Rather than total leucocyte count, the authors should have considered the differentials or at best Neutrophil-Lymphocyte ratio	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	If differential count or N:L were considered , yes	
Is the manuscript scientifically, correct? Please write here.	Five parts haematology analyser should have been the least more so in an academic city like IBADAN	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References would have been sufficient baring the inadequacies pointed	
Is the language/English quality of the article suitable for scholarly communications?	For scholarly communication in this dispensation, from a city like Ibadan, it leaves more to be desired	
<u>Optional/General</u> comments	<p>Considering TOTAL LEUCOCYTE COUNT and the use of HAEMOCYTOMETER for this work leaves more to be desired</p> <p>Authors should consider revisiting this concept using methods and parameters that are more specific and appropriate</p>
