Important Policies Regarding Peer Review

Peer review Comments Approval Policy: <https://r1.reviewerhub.org/peer-review-comments-approval-policy/>
Benefits for Reviewers: <https://r1.reviewerhub.org/benefits-for-reviewers>

PART 1: Comments

	Reviewer’s comment Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	To achieve better strategies for the prevention and management of HCV infection, the current knowledge regarding the prevalence of HCV merits investigation. Accordingly, the authors of this manuscript sought to evaluate the overall seroprevalence of HCV infection among hemodialysis patients in Egypt. The prevalence of HCV seropositivity was reported 45.13%, which is very high compared to the other parts of the world. Moreover, the acquisition of HCV infection during hemodialysis is considerably high (7.14%). The findings of this study contribute further evidence for informing reforms to the national guidelines for the management, prevention, and control of HCV infection among hemodialysis patients and accordingly in the community.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Is the manuscript scientifically, correct? Please write here.	Yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	

Review Form 3

Is the language/English quality of the article suitable for scholarly communications?	Yes	
<u>Optional/General</u> comments	To achieve better strategies for the prevention and management of HCV infection, the current knowledge regarding the prevalence of HCV merits investigation. Accordingly, the authors of this manuscript sought to evaluate the overall seroprevalence of HCV infection among hemodialysis patients in Egypt. The prevalence of HCV seropositivity was reported 45.13%, which is very high compared to the other parts of the world. Moreover, the acquisition of HCV infection during hemodialysis is considerably high (7.14%). The findings of this study contribute further evidence for informing reforms to the national guidelines for the management, prevention, and control of HCV infection among hemodialysis patients and accordingly in the community.	

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
