Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Advancing immunotherapy in TNBC is important for the scientific community as it addresses TNBC which is a highly aggressive cancer with limited treatment options. Research on immune checkpoint inhibitors (ICIs) and combination strategies provides valuable insights into tumor immunology, resistance mechanisms, and the role of the tumor microenvironment (TME). Identifying predictive biomarkers can optimize patient selection, leading to more effective and personalized treatments. These efforts not only improve TNBC outcomes but also contribute to the broader field of cancer immunotherapy, paving the way for innovative therapies in other malignancies.
