

Review Form 3

Journal Name:	Journal of Advances in Biology & Biotechnology
Manuscript Number:	Ms_JABB_130918
Title of the Manuscript:	Exploring the Dynamics of Genetic Parameters: Genetic Variability, Heritability and Character Association in Rice (<i>Oryza sativa</i> L.)
Type of the Article	

General guidelines for the Peer Review process:

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Genetic variability studies provides crucial insights for selecting desirable genotypes for breeding programme. Estimating heritability helps plant breeders determine the effectiveness of selecting desirable traits across generations.Character association analysis aids in identifying key traits that significantly contribute to improving rice productivity and quality.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Conclusion with recommendation should be added in the last portion of abstract	
Is the manuscript scientifically, correct? Please write here.	Yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References should be added in same format with doi Some recent studies about this field I recommend to add references 1. Hossain, M. M., Azad, M. A. K., Alam, M. S., & Eaton, T. E. (2021). Is the language/English quality of the article suitable for scholarly communications?	Yes but minor change is needed	
Optional/General comments	<p>Overall good some minor change is needed. Please follow the following instructions</p> <p>In the introduction part, the author's summary and description of literature review lack comprehensiveness regarding to the objectives of this study. Additionally, there is a lack of clarity in identifying the breakthrough point of this study and addressing key scientific problems.</p> <p>In materials and method part, Cultivate area with geographic location, cultivate condition like temperature, rainfall, humidity, precipitation should be added. Which data have you collected and which methods have you used to collect and measure the data you should explained properly</p> <p>In the result and discussion section need more clearly discussion the implications and underlying mechanisms within the experiment.</p>	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
