<p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<ol style="list-style-type: none"> 1 The article is about online monitoring of static voltage stability with use of SVM. Author should explain why this technique is better than other available techniques. Results should be compared with other techniques in terms of various factors. For example, prediction time comparison table. 2 Why 11 bus system is taken for study? Can another toolbox be taken to analyse the stability. 3 It is noted that some of references are relatively dated, please change or include recent references in the article 4 Author has integrated PV which is intermittent source of energy so he has not provided any alternative source of energy during its unavailability. With this integration cost of the system also increases, Author should provide cost analysis 5 Grammatical errors should be checked for example Pls check line 10 in section introduction , page 6; first line (buses, bus)
