

**Review Form 3**

Journal Name:	<a href="#">Journal of Engineering Research and Reports</a>
Manuscript Number:	Ms_JERR_129975
Title of the Manuscript:	<b>Optimizing Resource Allocation with Predictive Analytics: A Data-Driven Approach to Operational Efficiency</b>
Type of the Article	Review Article

**PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	This manuscript is an analysis that analyzes the role of predictive analytics as a game changer to tackle the issue of resource management which is of critical importance in many disciplines. It demonstrates the potential of sophisticated data and analytical techniques to solve pressing issues such as inefficiencies in operations, wastage and poor decision making in specialized areas such as Asset Management, manufacturing, Supply Chain Optimization, transport and logistics.	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	<b>Change the title to "Optimizing Resource Allocation with Predictive Analytics: A Review of Data-Driven Approaches to Operational Efficiency"</b> since it is all about review resource allocation	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	The mention of challenges, such as data quality and model scalability, reflects a balanced approach by addressing both the opportunities and limitations of predictive analytics. However, the abstract could benefit from a more concise structure to avoid redundancy and enhance readability, especially by streamlining the list of applications and examples. A brief mention of the scope or structure of the manuscript could also provide better context for the reader."	
<b>Is the manuscript scientifically, correct? Please write here.</b>	Based on the information provided, the manuscript appears to be scientifically correct as it discusses widely recognized and validated techniques such as time series forecasting, regression analysis, clustering, and optimization for resource management.	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	<p>The references listed in the manuscript cover a broad range of foundational and recent contributions in predictive analytics, machine learning, and their applications in various industries. However, the following observations and suggestions are made regarding the sufficiency and recency of references.</p> <p>Suggestions for Additional References:            GYUNAM PARK and MINSEOK SONG. (2023). "Optimizing Resource Allocation Based on Predictive Process Monitoring." <a href="#">IEEE Access</a> PP(99):1-1. DOI:<a href="#">10.1109/ACCESS.2023.3267538</a></p> <p><b>Recency:</b> While many references are recent (2020–2023), a significant number are older foundational works. While these are important, the manuscript could benefit from additional citations of recent research articles published in the last three years to reflect the latest advancements in predictive analytics and its applications.</p> <p><b>DOIs or URLs of the References:</b> Authors must verify the presence of a DOI or URL for each reference.</p>	

### Review Form 3

<b>Is the language/English quality of the article suitable for scholarly communications?</b>	The manuscript contains numerous grammatical mistakes. To improve the quality of manuscript article, consider using proofreading tools like <a href="#">Grammarly</a> .	
<b>Optional/General</b> comments	<ol style="list-style-type: none"><li>1. Reference Citations: Please ensure that all references are appropriately cited in the article's main text in ascending order, e.g. [1], [2]</li><li>2. Figure and table Citations: The citations for figures, for example, Fig.1 and Fig.2, must be corrected if figures are opted from other resources.</li></ol>	

### **PART 2:**

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
<b>Are there ethical issues in this manuscript?</b>	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	

### Reviewer Details:

Name:	<b>Girmay Mengesha Azanaw</b>
Department, University & Country	<b>University of Gondar, Ethiopia</b>
