PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable insights into the multifaceted nature of psychological distress in epileptic patients, emphasizing the significant impact of socioeconomic factors such as education and income. By identifying these critical determinants, the study underscores the need for a multi-pronged approach to address the mental health needs of this population, including initiatives that improve access to education and healthcare, reduce socioeconomic disparities, and provide targeted support for individuals from vulnerable backgrounds. The findings have important implications for clinicians, policymakers, and researchers in developing more effective and equitable mental health interventions for people with epilepsy.
