Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The study is a good area done on the socio-economic, communication and psychological characteristics of rural women of migrant households in Uttarakhand, India , due to migrating males of the village to different states in search of livelihood and more importantly the demographic imbalances due to out-migration of the male population . However, the variables chosen to study this impact are nowhere defined. Research methodology uses only percentages and maintains no uniformity about writing % or percent.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title will do but the contents don't actually reflect the socio-econmic , communication and psychological characteristics.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No structure are followed either in the main paper or in the abstract . The paper is full of typological errors, no comma at appropriate places , no hyphen where required, no uniformity maintained wherever hyphen are given , relative to the use of the same or similar word at other places. Headings and sub-headings are neither numbered nor properly organised. I have highlighted most of them.
