**PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This is an important topic as is it is cultural and has practices in tradition.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title needs more clarity. I would suggest:	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	In my view the abstract lacks important points: There needs to be a clear statement of the study objective Methods deployed including study design, sample size, analysis. There is too much information on the background which could be minimised.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is on an important topic that needs attention. The author has worked in depth to present important findings. Some points may be noted:  The introduction needs a rationale, an objective, there needs to be shown a gap in literature identified by the authors that led to this study. The abbreviations in tables need to be explained in footnotes. There are no ethical considerations mentioned.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	There is no in text citation throughout the introduction section. The tools used to collect the data need to be referenced.	
Is the language/English quality of the article suitable for scholarly communications?	This is fine.	
<u>Optional/General</u> comments
