

Review Form 3

Journal Name:	Microbiology Research Journal International
Manuscript Number:	Ms_MRJI_130861
Title of the Manuscript:	ANTIMICROBIAL RESISTANCE PATTERN OF SOME MICROORGANISMS ISOLATED FROM PACKAGED FOOD SAMPLES
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript addresses an important topic regarding microbial contamination and antimicrobial resistance (AMR) in packaged food, a significant public health concern. The study is well-timed given the increasing global awareness of AMR and the role of foodborne pathogens in its spread.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract effectively summarizes the study but is overly descriptive. Consider focusing more on the key findings and their implications. For example, explicitly mention the significance of detecting AMR in packaged foods and its potential risks to public health.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is generally well-organized, but certain sections, such as the "Introduction" and "Results and Discussion," contain redundant or overly descriptive text. The writing could benefit from more concise language and a stronger focus on interpreting the results in the context of public health implications	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are relevant but could be updated with more recent studies (post-2020) to reflect the latest advancements in AMR and food safety. Additionally, proper formatting and consistency in citation style should be ensured.	
Is the language/English quality of the article suitable for scholarly communications?	Simplify technical jargon where possible and avoid repetition to enhance readability. Consider a professional language edit to refine grammar and style.	
Optional/General comments	Minor revision <ol style="list-style-type: none"> 1. Clearly articulate the aspects of the study, such as resistance patterns in specific bacterial or fungal isolates, and compare them to previous studies. 2. Improve Writing Style: Simplify technical jargon where possible and avoid repetition to enhance readability. Consider a professional language edit to refine grammar and style. 3. Expand the Discussion: Link findings to global AMR trends and discuss their implications for public health, particularly in low-resource settings. 4. Update References: Include recent studies and ensure proper formatting of all references. 	

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
