Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Brucellosis diagnosis has always been difficult for clinicians and diagnosticians alike. A knowledge of seroprevalence of diseases in the community along with occupational history is of paramount importance in diagnosing such difficult to diagnose but easy to treat diseases.	
Is the title of the article suitable? (If not please suggest an alternative title)	Alternative title: Breaking the Diagnostic Enigma: Brucella Infection in the Spectrum of Pyrexia of unknown origin- One Year Experience at a Tertiary Care Hospital in North India.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	<p>The article says, the diagnostic success rate was 61.7%. Please clarify as the numbers of all diagnosed cases (rheumatoid+ Tuberculosis+ typhoid+ brucella etc) when added up comes to 79%.</p> <p>The language in the abstract is confusing.</p> <p>13% of cases out of 94 patients were diagnosed as Brucellosis by serology. This should be 12 patients. But the number mentioned in the study is n=13. Please clarify.</p> <p>The study says Brucella seroprevalence was 13%. In the discussion, the authors write it was 10.6% and 3.2% for IgM and IgG respectively. Please clarify.</p> <p>As per the study, all female patients were housewives. Is there any history of livestock contact in them?</p>
