

Review Form 3

Journal Name:	South Asian Journal of Social Studies and Economics
Manuscript Number:	Ms_SAJSSSE_129873
Title of the Manuscript:	Evaluation of the Impact of the Regional Road Grant Program (PHJD) on Accessibility and Land Use Changes in Humbang Hasundutan Regency
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This article is important for scientists and practitioners to uncover the link between infrastructure development and the accessibility of people's lives. It also explains the function of land from the environmental, economic, and social aspects of society.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, it is	

Review Form 3

<p>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</p>	<p>No it is not, some of sentences in the abstract not yet explain the result and analisis of the article</p>	
<p>Is the manuscript scientifically, correct? Please write here.</p>	<p>Yes it is, may be, its importan to upgrade some aspect in that article like in the introduction; method and result and discussion Introduction In the introducton, the novelty aspect of the research is not known, it should be reaffirmed. Methods The design of the research method must be explained systematically, if using questionnaire data, the tendency of the research is quantitative, so the main data is the data from the questionnaire analysis. But in this article, between interview data (qualitative data) and questionnaire data or questionnaires are combined - it should use a mix method. Results The t-test data presented in the abstract should not be in the form of a simple percentage, but explain the effect of variable x on y and so on. The t-test processing should be explained properly. If you look at the title and introduction, the aspects to be analyzed relate to the impact between variables, but the results described explain more about the relationship between variables, it should be emphasized that the impact or relationship will be analyzed? (these two things in statistical analysis have different points of view) Discussion At the beginning of the discussion, it should be adjusted to the research objectives, looking at aspects of the impact of the PHJD program on road access for the community and looking at aspects of the impact of PHJD on land use, while in the article, this has not been well illustrated. Some arguments in each explanation have not been equipped with citations or the latest reference sources</p> <p>Translated with DeepL.com (free version)</p>	
<p>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</p>	<p>I think many references can make the discussion of this article more qualified, especially the references which explain about impact of infrastructure build and welfare community also environment In this article, the author minimize cited the new article which correlate with the topic</p>	
<p>Is the language/English quality of the article suitable for scholarly communications?</p>	<p>Yes it is</p>	
<p>Optional/General comments</p>		

PART 2:

	<p>Reviewer's comment</p>	<p>Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</p>
<p>Are there ethical issues in this manuscript?</p>	<p><i>(If yes, Kindly please write down the ethical issues here in details)</i></p>
