Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable clinical evidence supporting the immediate therapeutic effect of ultrasound therapy on muscle fatigue in patients with temporomandibular disorders. The findings offer a quantifiable, objective measure of improvement through the wooden spacer test, strengthening the rationale for incorporating this modality into TMD management protocols. Furthermore, the study contributes to the understanding of non-invasive, physical therapy interventions for orofacial pain, which is crucial for developing comprehensive and conservative treatment strategies.
