

Editor's Comment:

Ok for the above paper regarding the main income source for each and every Government.

The title should be without the Contributory term, only the Impact of Tax-Based.....

Very interesting are the findings considering reducing taxes on oil and increasing them in non-oil domains in order to develop the economy.

Also, the final part is Conclusions, at plural. In this part it appears the word citizenry, instead of citizens.

For the TAX Impact on Economy, this paper is very adequate.

Accepted after the revision.
