EDITORIAL COMMENT'S on revised paper (if any)	Authors' response to editor's comments
<p>This paper suggests a new method but it does not explain very well their method for all sections of the paper. They have to explain explicitly this method (notations, abbreviations, parameters, and etc.), not just giving equations but also explaining all things. The empirical study must be well written, results. Because of this, the authors have to improve this paper.</p>	<p>We have changed the methodology and notations used section by explaining all the things, not just giving equations. Notations, abbreviations and parameters have been modified. Empirical study section has been modified accordingly. See changes in blue.</p>
